

## **Public Health Foundation of India: Workshop Series**

The Indian Institute of Public Health, Delhi (IIPH-D), established by the Public Health Foundation of India ([www.phfi.org](http://www.phfi.org)) has successfully been functioning since 2008 as one of the nodal institutions for public health education, advocacy, research and practice by providing quality public health training to graduates of diverse disciplines since 2008.

Apart from conducting full time academic courses, we also have been organizing several short term trainings for past five years.

In this context, we are glad to announce our “Workshop Series” for the academic year 2014 – 2015. This is specially targeted to researchers and project managers in the field of clinical and public health. The workshops in this series aim to enhance the capacity of health care professionals in various quantitative and qualitative research techniques; analytical skills; project management; advocacy and social marketing.

Please click on the link below to access the complete brochure and registration form: [Workshop Series 2014-2015](#)
